Flyer Drinking Water Safety in East Chicago_GWDWB_Final.docx

Hi Josh and Jeff,

Andrea has incorporated IDEM's edits into the latest draft of the flyer that Rita provided yesterday. This version is considered done by the R5 WD and IDEM.

Please let us know if you need anything else on East Chicago. I am acting for Tom and Rita today.

Best wishes,

Heather

Subject: RE: DRAFT flyer for East Chicago drinking water

Hi All,

I just spoke with IDEM.

They have one major edit to the fact sheet. Please edit this sentence:

“East Chicago water is treated to keep leadedpipes from getting into the water.” (Comment: leaded pipes do not get into the water)

Something like this would be more accurate:

“East Chicago water is treated to keep the lead from leaded pipes from getting into the water.”

IDEM is waiting to hear back from East Chicago on the particular corrosion control chemical used by the system. While we definitely want this information, it shouldn't hold up the fact sheet.

Let me know what else you need on this.

Thanks,

Andrea Porter

Mary, we have been asked by our Office of Public Affairs to review the East Chicago draft flyer they have developed. I wanted to give you an opportunity to review it and to also help us answer the remaining question. You mentioned on today's call about getting back to Miguel when you hear back from the City about the CCT. You said you would follow-up with me or Andrea on this when you have it. We need to find out if East Chicago is adding some kind of orthophosphate for CCT beyond the polyphosphate addition. Attached is the flyer with my suggested edits added.

Rita or Heather,

Please take a look at the attached draft flyer and let me know if it looks accurate or if there is anything that you think should be changed. Please also let me know if there is any info that you think should be added.

This flyer is based on points that Tom worked on earlier this week, but I have made a few changes to try to make it more direct.

Thank you.

Josh
